

Hermann Thorisson

Coupling, Stationarity, and Regeneration

With 27 Illustrations

Springer

Contents

Preface	vii
1 RANDOM VARIABLES	1
1 Introduction	1
2 The i.i.d. Coupling – Positive Correlation	2
3 Quantile Coupling – Stochastic Domination	3
4 Coupling Event – Maximal Coupling	6
5 Poisson Approximation – Total Variation	11
6 Convergence of Discrete Random Variables	15
7 Continuous Variables – Hitting the Limit	18
8 Convergence in Distribution and Pointwise	21
9 Quantile Coupling – Dominated Convergence	26
10 Impossible Coupling – Quantum Physics	27
2 MARKOV CHAINS AND RANDOM WALKS	33
1 Introduction	33
2 Classical Coupling – Birth and Death Processes	33
3 Classical Coupling – Recurrent Markov Chains	38
4 Classical Coupling – Rates and Uniformity	44
5 Ornstein Coupling – Random Walk on the Integers	47
6 Ornstein Coupling – Recurrent Markov Chains	52
7 Epsilon-Coupling – Nonlattice Random Walk	57
8 Epsilon-Coupling – Blackwell’s Renewal Theorem	62
9 Renewal Processes – Stationarity	68
10 Renewal Processes – Asymptotic Stationarity	72

3	RANDOM ELEMENTS	77
1	Introduction	77
2	Back to Basics – Definition of Coupling	78
3	Extension Techniques	80
4	Conditioning – Transfer	86
5	Splitting	93
6	Random Walk with Spread-Out Step-Lengths	98
7	Coupling Event – Maximal Coupling	104
8	Maximal Coupling Two Elements – Total Variation	107
9	Hitting the Limit	113
10	Convergence in Distribution and Pointwise	117
4	STOCHASTIC PROCESSES	125
1	Introduction	125
2	Preliminaries – What Is a Stochastic Process?	126
3	Exact Coupling – Distributional Exact Coupling	136
4	Distributional Coupling	140
5	Exact Coupling – Inequality and Asymptotics	142
6	Exact Coupling – Maximality	146
7	Coupling with Respect to a Sub- σ -Algebra	149
8	Exact Coupling – Another Proof of Theorem 6.1	153
9	Exact Coupling – Tail σ -Algebra – Equivalences	156
5	SHIFT-COUPLING	161
1	Introduction	161
2	Shift-Coupling – Distributional Shift-Coupling	162
3	Shift-Coupling – Inequality and Asymptotics	165
4	Shift-Coupling – Maximality	169
5	Shift-Coupling – Invariant σ -Algebra – Equivalences	174
6	ε -Coupling – Distributional ε -Coupling	178
7	ε -Coupling – Inequality and Asymptotics	180
8	ε -Coupling – Maximality	187
9	ε -Coupling – Smooth Tail σ -algebra – Equivalences	188
6	MARKOV PROCESSES	195
1	Introduction	195
2	Mixing and Triviality of a Stochastic Process	195
3	Markov Processes – Preliminaries	201
4	Exact Coupling	204
5	Shift-Coupling	207
6	Epsilon-Coupling	209
7	Stationary Measure	213
7	TRANSFORMATION COUPLING	217
1	Introduction	217

2	Shift-Coupling Random Fields	218
3	Transformation Coupling	222
4	Inequality and Asymptotics	225
5	Maximality	228
6	Invariant σ -Algebra and Equivalences	231
7	Topological Transformation Groups	238
8	Self-Similarity – Exchangeability – Rotation	241
9	Exact Transformation Coupling	244
8	STATIONARITY, THE PALM DUALITIES	249
1	Introduction	249
2	Preliminaries – Measure-Free Part of the Dualities	251
3	Key Stationarity Theorem	254
4	The Point-at-Zero Duality	258
5	Interpretation – Point-Conditioning	264
6	Application – Perfect Simulation	271
7	The Invariant σ -Algebras $\mathcal{I}$ and $\mathcal{J}$	281
8	The Randomized-Origin Duality	284
9	Interpretation – Cesaro Limits and Shift-Coupling	288
10	Comments on the Two Palm Dualities	290
9	THE PALM DUALITIES IN HIGHER DIMENSIONS	295
1	Introduction	295
2	The Point-Stationarity Problem	296
3	Definition of Point-Stationarity	302
4	Palm Characterization of Point-Stationarity	308
5	Point-Stationarity Characterized by Randomization	317
6	Point-Stationarity and the Invariant σ -Algebras	320
7	The Point-at-Zero Duality	323
8	The Randomized-Origin Duality	328
9	Comments	335
10	REGENERATION	337
1	Introduction	337
2	Preliminaries – Stationarity	339
3	Classical Regeneration	346
4	Wide-Sense Regeneration – Harris Chains – $GI/GI/k$	358
5	Time-Inhomogeneous Regeneration	372
6	Classical Coupling	385
7	The Coupling Time – Rates and Uniformity	399
8	Asymptotics From-the-Past	422
9	Taboo Regeneration	436
10	Taboo Stationarity	451
11	Perfect Simulation – Coupling From-the-Past	467
